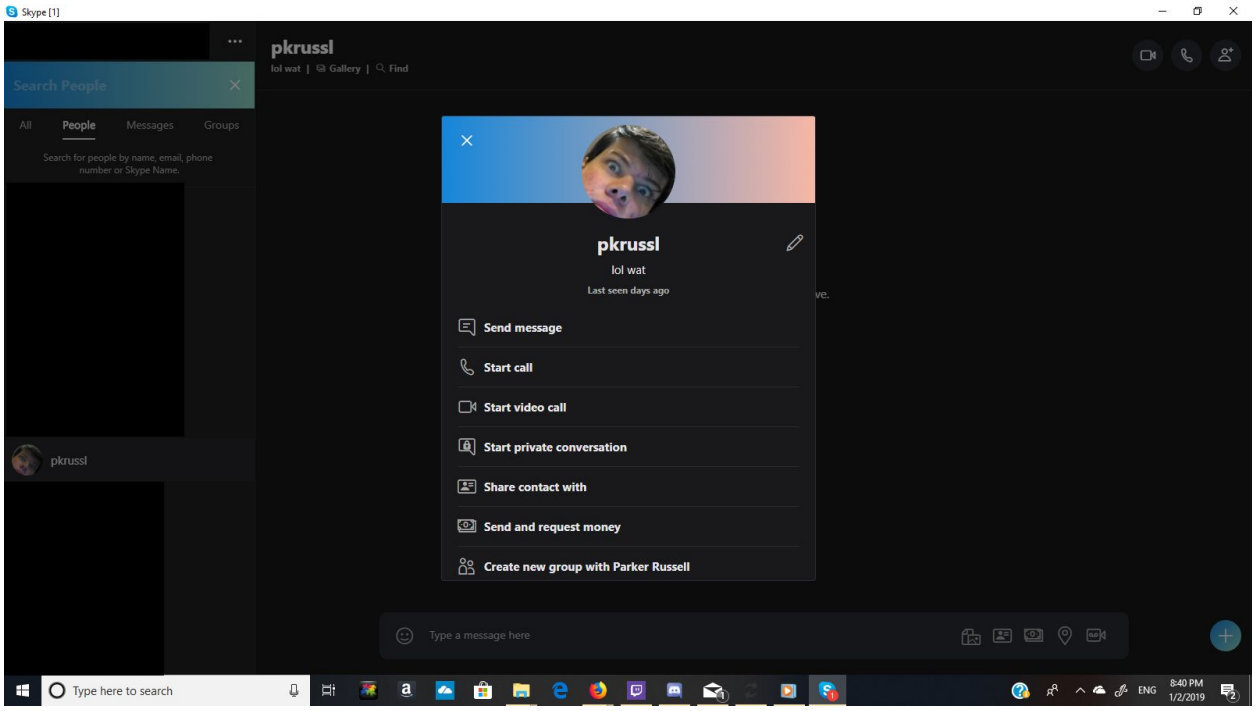
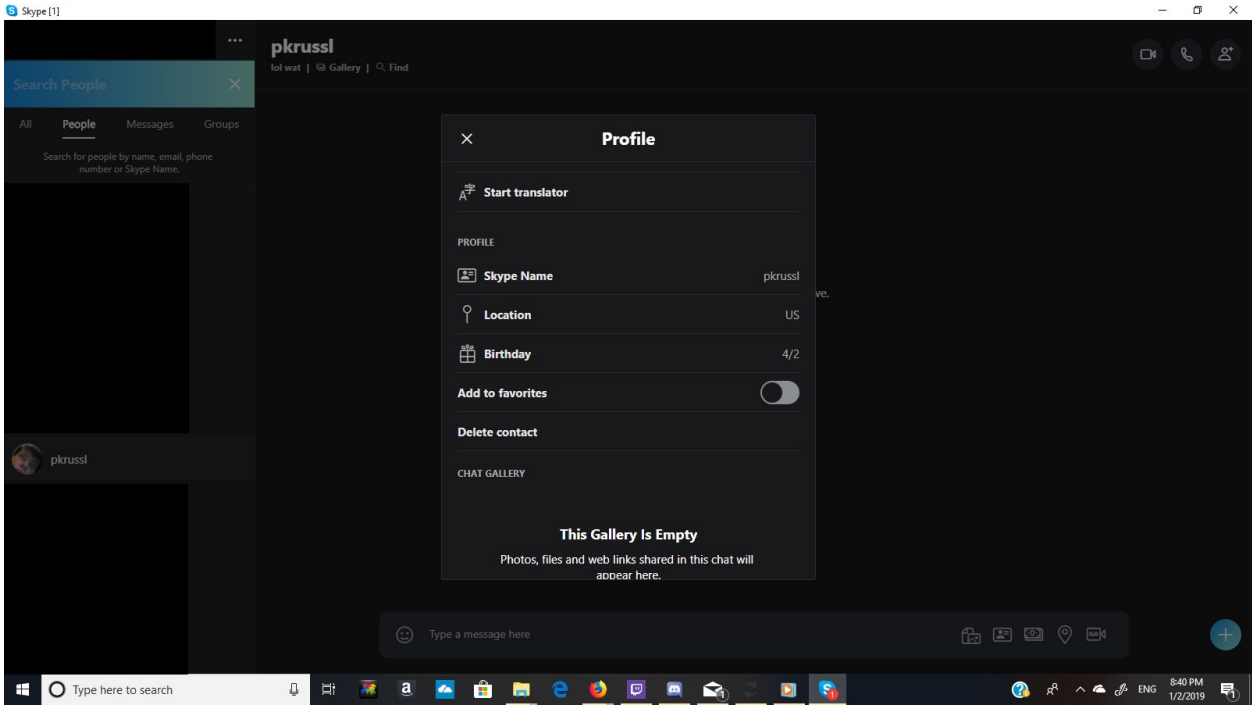
Hs2012 and the Pkrussl Skype Account

I reached out to a user on Deviantart who knew hs2012. They confirmed hs2012 shared Skype contact information with them and gave these screenshots from their Skype friends list to me. Unrelated names have been censored to protect privacy.





The person who gave me these screens could not explain how else they could have gotten the “pkrussl” Skype account in their contacts, as they never spoke to anyone on DA or other websites with the username Pkrussl. This person has asked not to be named. Mimidiggz spoke with this person as well and was given the same information and explanation.

I looked further into this account to collect more information. The birthday listed is April 2. This matches Parker’s birthday.

I double checked to make sure 4/2 denoted April 2 and not February 4. I can confirm Skype does display birthdays in month/day format. For example, here is how it displays the date February 25.

The location listed, Kansas, matches location from Parker's Steam account.

I ran the profile picture through reverse image searches and checked Parker's Facebook and Instagram accounts. I got not hits. This appears to be an original upload of a photo of him.

I am aware the "live:pkrussl" Skype accounts. This is not proof the "pkrussl" account is not his. Here is an explanation on how Skype names and Live names work.

> When you signed up for Skype, you get a Skype Name. Also if you use e mail or phone number to sign up you get a Live ID as well. Live ID is in the form of Live:first part of your mail or Live:alphanumeric characters for phone numbers.
>
> When somebody searches for you, he sees 3 results because he gets Skype Name, Live ID and Microsoft Account.
>
> All 3 are valid for Skype purpose to add you.
